

Terraform Automation Platform for **Financial Services Industry**

ControlMonkey provides a powerful, unified way to visualize, spin-up, automate and govern cloud infrastructure end-to-end, at any scale, for any future.

TOTAL CLOUD CONTROL WITH TERRAFORM IMPACT

30%

Increase
DevOps Efficiency

50%

Less
Compliance Issues

100%

Control
Over your Cloud

Day 2 **Challenges**

In the cloud involves large, complex and hard to maintain environments.

- Compliance slows down delivery
- Long audit processes for SSDLC
- Firefighting production non-compliant misconfigurations (e.g PCI-DSS)
- DevOps teams under a heavy workload, less bandwidth for innovation

The **Proactive** Approach

It is time for a new benchmark for proactive cloud management.

- 99% Terraform coverage - DRP ready
- Shift-left security & compliance of cloud infrastructure
- Identify deviations from desired configuration
- Spin up Infrastructure using compliant, pre-defined blueprints

HONEYBOOK

DevOps-first Solutions for FSI

Shift from reactive to proactive cloud operations. Maximize your cloud with one platform

Cloud inventory

Visualize all resources cross accounts, understand Terraform coverage and identify ClickOps activity

Import to Terraform

Shift cloud resources to Terraform in a single click with automatic code generation

Self-service Infrastructure

Enable different teams to launch cloud environments from pre-defined, compliant blueprints

Terraform CI/CD

GitOps CI/CD pipeline with built-in proactive controls and security standards (e.g PCI-DSS)

Cloud backup

Enhance resilience with a daily cloud configuration backup

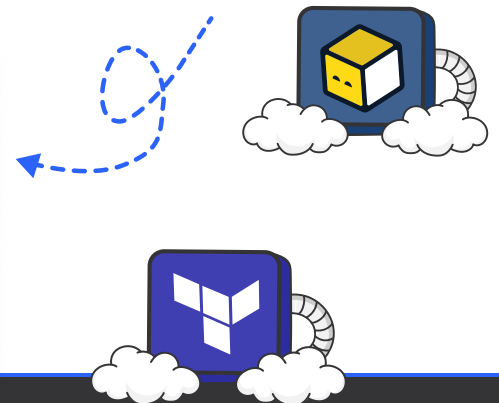

Drift detection

Easily detect and remediate deviations from desired state in real-time

ControlMonkey gave us a seamless way to back up our infrastructure code with full coverage and alerting, eliminating any guesswork around what's managed. Doing this ourselves would have taken quarters of effort for just a fraction of the value we get from their Platform

Ben Apprederisse, Platform Technical Lead

Built for DevOps by DevOps

ControlMonkey was founded by serial entrepreneurs, former AWS employees and DevOps enthusiasts
